<sup>1</sup> Teaching about FGM could be included in units on health, keeping safe, safe relationships, privacy, body parts (including external genitalia). See our Addressing FGM in schools information sheet for further information <sup>2</sup>Pupils are often aware that sexual intercourse does not always result in a baby and they may already be aware of or have heard about some common methods of contraception (e.g. condoms, the contraceptive pill or avoiding sexual intercourse). A basic understanding of contraception can be taught at primary level. This may include basic information about common forms of contraception (for example, condoms and the contraceptive pill) and how these can prevent a baby being made. Schools will need to decide whether this is appropriate for their community and cohorts and consider how to approach this as part of Sex Education.
